

Western Harbour Tunnel and Beaches Link

Northbridge key facts

- ✓ NO tunnel ventilation outlet proposed for the Northbridge area
- ✓ Current geotechnical test drilling to over 150 metres below street level
- ✓ Tunnels would be Sydney's deepest - an average of 90 metres deep
- ✓ Project team on track to deliver Reference Design by mid-2018

The planning process

Key facts

The concept design for the proposed Western Harbour Tunnel and Beaches Link project was released in March.

2,175 people have attended 16 Community Feedback Sessions to provide comments and input.

Feedback provided by the community is being taken into account as the project continues to develop across 2017 and into 2018.
